JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY

Vol. 322 Nos. 1 and 2 10 JANUARY 1992

CONTENTS

Electrical control of reversible microgel flocculation and its estimated performance as a display device
T. Sawai (Tokyo, Japan), S. Yamazaki, Y. Ishigami (Ibaraki, Japan), Y. Ikariyama and M. Aizawa (Yokohama, Japan) 1

Hilbert transformation of immittance data using the Fast Fourier Transform
T.J. VanderNoot (London, UK) 9

Reversible cyclic voltammetry in the presence of product
A.M. Keightley, J.C. Myland, K.B. Oldham and P.G. Symons (Peterborough, Canada) 25

Current–potential characteristic of ion transfer across the interface between two immiscible electrolyte solutions based on the Nernst–Planck equation
T. Kakiuchi (Kyoto, Japan) 55

Frequency dispersion associated with a non-homogeneous interfacial capacitance
B. Kurtyka and R. de Levie (Washington, DC, USA) 63

A method to determine the size of surface active particles from heterocoalescence signals at the dropping mercury electrode
J. Tomaić, T. Legović and V. Žutić (Zagreb, Croatia) 79

The mechanism of electrointercalation
P.G. Bruce and M.Y. Saidi (Scotland, UK) 93

Tritium and neutron emission in D_2O electrolysis at Pd and Ti cathodes
G. Mengoli, M. Fabrizio, C. Manduchi, G. Zannoni, L. Riccardi and A. Buffa (Padova, Italy) 107

Electrochemical behavior of Cr(II) and Cr(III) ions in weakly acidic solutions
P.K. Wrona (Warsaw, Poland) 119

A comparative study of the interphase between mercury and aqueous solutions of mono-, di- and trivalent chlorides
R. Andreu and M. Molero (Seville, Spain) 133

Electrochemical polymerization of pyrrole in aqueous buffer solutions
Q. Pei and R. Qian (Beijing, China) 153

In-situ conductance measurement during electropolymerization
J. Kankare and E.-L. Kupila (Turku, Finland) 167

The photo-isomerisation of *cis*-azobenzene. A channel electrode study
R.G. Compton, R.G. Wellington (Oxford, UK) D. Bethell, P. Lederer (Liverpool, UK) and D.M. O'Hare (Oxford, UK) 183

Differential pulse voltammetry of reversible redox species at interdigitated array electrodes
M. Morita, T. Horiuchi and H. Tabei (Ibaraki, Japan) 191

Electro-oxidation of methanol on graphite-supported perovskite-modified Pt electrodes in alkaline solution
P.C. Biswas and M. Enyo (Sapporo, Japan) 203

Cyclic voltammetry, ESR and optical study of the electrochemical reduction of dibenz[b,e]-thiepinon-5,5-dioxides
M. Ciureanu, M. Hillebrand and E. Volanschi (Bucharest, Romania) 221

Electroreduction of CO_2 on differently prepared copper electrodes. The influence of electrode treatment on the current efficiences
G. Kyriacou and A. Anagnostopoulos (Thessaloniki, Greece) 233

The electrochemical behaviour of hydrous palladium oxide layers formed at high positive potentials in different electrolyte solutions
A.E. Bolzán and A.J. Arvia (La Plata, Argentina) 247

Palladium electrodeposition from Ammonia-free electrolyte
C.K. Lai, Y.Y. Wang and C.C. Wan (Hsinchu, Taiwan) 267

Inhibition of the underpotential deposition of copper on single crystalline platinum surfaces
D.P. Bhatt, T. Twomey, W. Plieth, R. Schumacher and H. Meyer (Berlin, Germany) 279

An FTIR study of adsorbed sulfate species on polycrystalline platinum with application of group theory to the problem of band assignment for adsorbed species
F.C. Nart and T. Iwasita (Bonn, Germany) 289

Electrochemistry of hydrophobic Nafion gels Part 3. Preconcentration and electrochemical detection of cationic and neutral organic compounds in hydrophobic Nafion gels made from various *n*-alkylphosphates
P. Audebert (Paris, France), B. Divisia-Blohorn, P. Aldebert and F. Michalak (Grenoble, France) 301

In-situ monitoring of microrheology on electrochemical deposition using an advanced quartz crystal analyzer and its application to polypyrrole deposition
H. Muramatsu, X.Ye, M. Suda, T. Sakuhara and T. Ataka (Chiba, Japan) 311

The adsorption of Ni(cyclam)$^+$ at mercury electrodes and its relation to the electrocatalytic reduction of CO_2
G.B. Balazs and F.C. Anson (Pasadena, CA, USA) 325

Adsorption and oligomerization of indole molecules at Ag electrode as studied by SERS spectroscopy
J. Bukowska and K. Jackowska (Warsaw, Poland) 347

Adsorption of pyridine at the Au(311)–solution interface
L. Stolberg, J. Lipkowski (Guelph Canada) and D.E. Irish (Waterloo, Canada) 357

The absorption of hydrogen and deuterium in thin palladium electrodes. Part II: Basic solutions
A. Czerwinski and R. Marassi (Camerino, Italy) 373

Preliminary notes

Mechanisms of reductive addition of CO_2 to quinones in acetonitrile
T. Nagaoka, N. Nishii, K. Fujii and K. Ogura (Yamaguchi, Japan) 383

Preparation for platinum electrode with single crystal (100) film
M.P. Sumino and S. Shibata (Sendai, Japan) 391

On the redox response of insoluble deposits of hexa-alkoxytriphenylenes at solid anodes
J. Simonet and J.-M. Chapuzet (Rennes, France) 399

On thionine adsorption at platinum and sulphur-modified platinum electrodes
J. Clavilier (Meudon, France) and V. Svetličić (Zagreb, Croatia) 405
